LEVELMASTER

Levelmaster

For over 10 years, Levelmaster has been a leading supplier of adjustable foundation products servicing the building industry. Our industry knowledge is extensive with years of experience means that we can offer our customers advice on the correct product selection and support that with prompt despatch. Our products meet or exceed building regulations and are the first choice of designers and specifiers.

Our Commitment to you

We specialise in supplying our range in the shortest possible lead times ensuring that your building needs are delivered seamlessly. In support, all our products hold engineering certifications so that you can use and recommend our products with complete confidence. Furthermore, all Levelmaster products carry a comprehensive warranty on workmanship and materials.

Solutions for the Trade

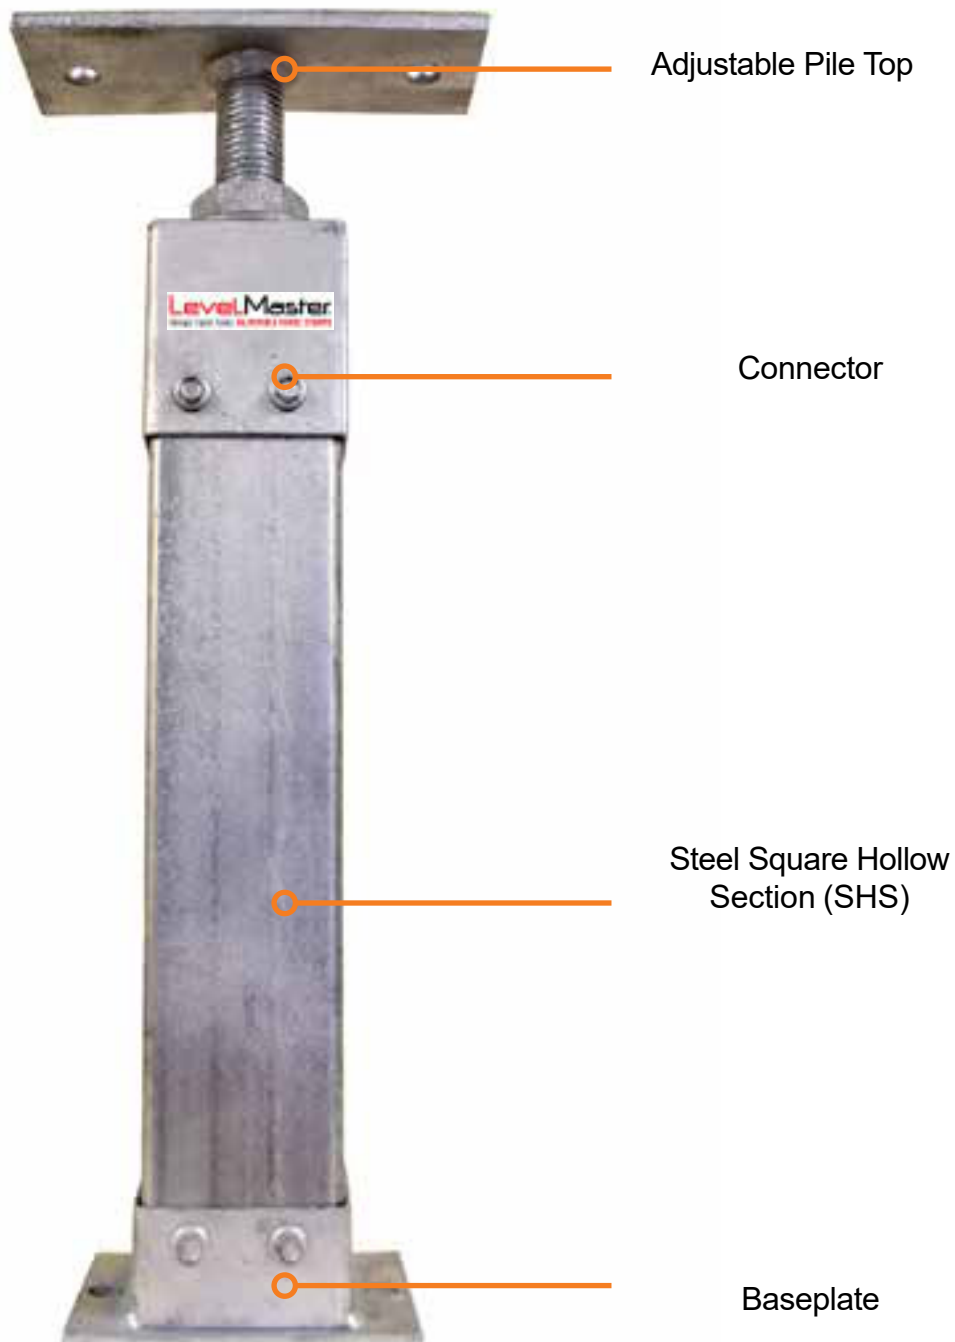

Our unique patented designs have been created to solve a multitude of problems in today's building environment. Our adjustable pile product provides solutions for areas of soil movement and building blocks with difficult terrain. Installation times have been greatly reduced as no onsite welding or pre-fabrication is required.

Hand in hand with Levelmaster stumps is our certified subfloor bracing which is available to suit a wide range of applications.

We offer great flexibility with our stair stringer range utilizing a unique interchangeable and adjustable base to suit both cast in concrete or bolt down versions. All finished in hot dipped galvanising for added protection.
